Erika Alexandra García Barrios

Full Stack Developer · TypeScript, React and Next.js · Spring Boot and FastAPI

Medellín, Colombia · +57 302 520 8281 · alexandra.software.engineer@gmail.com
Portfolio: pandorariot.github.io/MiPortafolio/full-stack/ · linkedin.com/in/alexandragarciabarrioseng · github.com/PandoraRiot

PROFESSIONAL SUMMARY

Full Stack Developer who ships complete products, from the browser to the database. I built and launched an installable PDF reader (a TypeScript and Preact PWA) with on-device neural voices, offline translation and 658 automated tests, and a custom e-commerce site for a client with Next.js 16 and a Spring Boot 4 backend using Spring Security, JPA, Flyway and PostgreSQL. I have professional backend Java experience for public and private organizations, with REST and SOAP APIs and frontend–backend integration. I deploy to Vercel, Cloudflare and Docker containers, with CI on GitHub Actions. Expected graduation: December 2026.

EXPERIENCE

AI Systems & Automation Engineer — Independent / Freelance 2023 — Present

Design and development of AI systems with LLMs, RAG and agents, plus custom web development for clients, integrated through APIs, web interfaces and containers.

- Vella Perfumería (client): custom e-commerce with Next.js 16, React 19, TypeScript and Tailwind, and a Spring Boot 4 backend with Spring Security, JPA, Flyway and PostgreSQL; real catalog of 62 products, cart, payments and admin panel. Storefront live on Vercel.
- JARVIS: personal AI assistant with an orchestrator and 4 specialized agents, RAG on Pinecone and automatic fallback across Groq, Gemini and Ollama (details under Projects).
- Montajes y Servicios García (client): bilingual (Spanish/English) landing page with light and dark themes, responsive design and direct WhatsApp contact, deployed on Vercel.
- SaberPro-RAG: RAG study assistant covering the five modules of Colombia's Saber Pro exam (Qdrant, sentence-transformers, Ollama / Mistral), documented with ADRs.

Python · FastAPI · React · Next.js · TypeScript · Spring Boot · PostgreSQL · Docker · LLMs · RAG · AI Agents · Redis · Vercel

Data Science & Machine Learning Researcher — CognIA Research Group — Institución Universitaria Pascual Bravo Feb 2026 — Present

Predictive models to classify benign and malignant breast tumors with the Breast Cancer Wisconsin Diagnostic dataset.

- Compared logistic regression, decision trees, random forest, SVM and KNN with K-Fold cross-validation, stratified splits and hyperparameter tuning.
- Exploratory analysis, cleaning, transformation and feature selection with descriptive statistics and correlation analysis.

Python · Scikit-learn · Pandas · NumPy · Matplotlib · Seaborn · Transformers · CNN · SVM

AI & Computer Vision Researcher — Undergraduate thesis — Institución Universitaria Pascual Bravo Sep 2025 — Jun 2026

Deep learning to classify benign and malignant breast lesions in DCE-MRI. Thesis approved in September 2026; now being turned into a scientific paper with the guidance of Dr. Rubén Darío Fonnegra Tarazona.

- Compared ResNet50, EfficientNet-B3 and MobileViT-S with transfer learning and progressive fine-tuning, K-fold cross-validation during training and a final patient-level hold-out evaluation (BreastDM).
- Final ResNet50 model on the test set (35 patients): ROC-AUC 0.941, sensitivity 0.864 (19 of 22 malignant), specificity 0.846 and F1 0.884; calibrated AUC (isotonic) 0.897, 95% CI [0.766, 0.992].

Python · PyTorch · OpenCV · ResNet50 · EfficientNet-B3 · MobileViT-S · Grad-CAM · MLflow · TensorBoard

Webmaster · Institutional Web Development (contractor) — Institución Universitaria Pascual Bravo Jul 2025 — Oct 2025

Management and development of the university's web platforms and support for digital transformation initiatives.

- Maintained, updated and optimized institutional web platforms, improving responsive design, usability and user experience.
- Automations with Google Apps Script.
- Moodle administration (modules, permissions and course publishing) and WordPress administration (Continuing Education and PITS news).
- Technical support, requirements management and institutional audiovisual production: photography, interviews and event coverage.

HTML · CSS · JavaScript · Google Apps Script · WordPress · Moodle

Junior Full Stack Developer — Java Backend — Servisoft S.A. Jun 2023 — Sep 2024

Custom Java backend solutions for public and private sector clients: DANE, JEP, Medellín City Hall, Medellín District Comptroller's Office, Bucaramanga Metropolitan Water Utility, UPB, Pascual Bravo and Viva.

- Backend development in Java 8/12 (Java SE, JSP, Servlets, JDBC) on Apache Tomcat 6–9, with REST and SOAP APIs for critical applications.
- MSSQL, Oracle and MongoDB: CRUD operations, stored procedures and query optimization.
- Diagnosed, fixed and modernized legacy systems in Java and JavaScript, providing technical and functional support.
- Complex business logic and frontend-backend integration using OOP and design patterns (Strategy, Factory, Repository).
- Version control with GitHub and GitLab, and technical documentation for future maintenance.

Java 8/12 · JSP · Servlets · JDBC · Apache Tomcat · REST · SOAP · MSSQL · Oracle · MongoDB · Git

Software Development Intern — MV-TEL SAS Jun 2021 — Nov 2021

Full development cycle of a mobile app and the corporate website within a Scrum team.

- Requirements gathering and analysis, functional design, architecture definition and feature validation.
- Responsive corporate website with HTML, CSS and JavaScript.

Java · Selenium WebDriver · HTML · CSS · JavaScript · Scrum

RESEARCH AND PUBLICATIONS

- Scientific paper (in preparation): deep learning classification of benign and malignant breast lesions in DCE-MRI (ResNet50, EfficientNet-B3 and MobileViT-S; ROC-AUC 0.941), derived from the approved thesis, under the guidance of Dr. Rubén Darío Fonnegra Tarazona.
- Speaker at the 21st International Energy Symposium — Expotecnológica 2026 (XXI SIE–2026): “Breast lesion classification using deep learning on magnetic resonance imaging”, co-authored with Rubén Darío Fonnegra.

SELECTED PROJECTS

Lector de PDF — audiobook and English-learning PWA lector-pdf-pandora.vercel.app

Installable web app (PWA) that turns PDFs, EPUBs, Word files, web pages and photos of books into audiobooks with neural voices running on the device itself, with no accounts or server, and teaches English.

- Piper neural voices running in the browser with ONNX Runtime Web; automatic OCR of scanned pages with Tesseract.js.
- Offline Spanish ⇄ English translation (Firefox Translations in WebAssembly), bilingual reading and spaced-repetition practice (Leitner).
- A1/A2 course with online rooms on Cloudflare Workers; screen-off playback and MP3 export.
- 601 unit tests and 57 end-to-end tests (Playwright), CI on GitHub Actions and compatibility tested on Chrome and Safari; deployed on Vercel.

TypeScript · Preact · Vite · PWA · ONNX Runtime Web · Piper · pdf.js · Tesseract.js · WebAssembly · Cloudflare Workers · Playwright · Vitest · GitHub Actions · Vercel

Vella Perfumería — custom e-commerce (client) vellaperfumeria.vercel.app

Custom online store for a client in Colombia, with a real catalog of 62 products. Storefront live on Vercel; backend being prepared for production.

- Java 21 and Spring Boot 4 backend organized by domain modules: catalog, cart, orders, payments, inventory, promotions, notifications and admin.
- Spring Security as an OAuth2 resource server (JWT), input validation, Spring Data JPA and versioned Flyway migrations on PostgreSQL.
- Stripe payments and an API documented with OpenAPI (springdoc).

Java 21 · Spring Boot 4 · Spring Security · OAuth2 · Spring Data JPA · Flyway · PostgreSQL · Stripe · OpenAPI · JUnit 5 · Testcontainers · Next.js · React · TypeScript · Docker

JARVIS — Personal AI Assistant Platform

Modular AI system with a FastAPI backend and a React dashboard.

- LLMs with automatic fallback: a 6-model chain (GPT-OSS 120B/20B and Qwen on Groq, Gemini, local Mistral and Phi-3 with Ollama) behind an in-house gateway with token control, retries and circuit breaker.
- Orchestrator with 4 specialized agents (developer, security, reviewer and drafter), function calling, risk-based permissions, human approval and an audit log of every tool call.
- RAG on Pinecone with multilingual-e5 embeddings and a BGE reranker, validated with a custom evaluation set (recall@3 = 1.0).

FastAPI · React · Claude · Groq · Ollama · Pinecone · Redis · Supabase · MLflow · Prometheus · Grafana · Docker · Kubernetes

TECHNICAL SKILLS

Frontend & web: JavaScript, TypeScript, React, Next.js, Tailwind CSS, HTML5, CSS, Bootstrap, WordPress, Moodle, Google Apps Script, Component-based UI

Backend & Java: Java 8/12, Spring Boot, Spring Framework, Spring Security, JPA, REST APIs, SOAP APIs, Microservices, JSP, Servlets, JDBC, Apache Tomcat, FastAPI, Flask

Databases: PostgreSQL, MSSQL, Oracle, MySQL, MongoDB, Redis, Supabase, Flyway

Automation & testing: Playwright, Selenium, Pytest, Unit testing, E2E testing, BeautifulSoup, Process automation, n8n, Zapier, Make, RPA, yt-dlp, HLS / m3u8, Stream processing, Pipeline orchestration

MLOps, cloud & infrastructure: MLflow, Databricks, PySpark, Apache Spark, Terraform, TensorBoard, Hadoop, Airflow, ETL pipelines, Docker, Kubernetes, AWS (EC2, S3, VPC, RDS), GitHub Actions, Prometheus, Grafana, Vercel

Architecture & design: Hexagonal architecture, Clean Architecture, Layered architecture, SOLID principles, Object-oriented programming, Design patterns, ADRs

Generative AI & agents: LLMs, Generative AI, Claude, GPT-OSS, Llama 3, Mistral 7B, Phi-3, RAG, Embeddings, Semantic search, Reranking, Pinecone, Qdrant, Prompt engineering, AI agents, Multi-agent systems, Function calling, Local inference with Ollama, Whisper, Claude Code

EDUCATION

B.Sc. in Software Engineering — Institución Universitaria Pascual Bravo — Feb 2025 — Dec 2026

Coursework completed; graduation expected in December 2026.

Process Automation Specialization (36 h) — Nodo + Accenture — Sep 2026 — Nov 2026

In progress: n8n, Zapier, Make, LLM APIs and RAG chatbots.

Digital Transformation with AI and Automation (certified) — Nodo + Accenture Scholarships — 2026 · cohort G3

AI and automation applied to digital transformation: process analysis and identification of automation opportunities.

Artificial Intelligence Diploma · Intermediate (280 h) — Universidad de Antioquia + Talento Tech — Feb 2026 — Apr 2026

Cloud Architecture Diploma · Advanced (232 h) — ESUMER — Oct 2024 — Dec 2024

Web Programming — Universidad Pontificia Bolivariana — Oct 2022 — Dec 2022

Data Science Diploma (380 h) — ESAP — Aug 2022 — Oct 2022

Software Development Technologist — Institución Universitaria Pascual Bravo — Aug 2017 — Jan 2022

Computer Maintenance Technician — SENA — 2017 — 2018

All of my education has been funded by scholarships earned through good academic performance: Sapiencia, Participatory Budget, Matrícula Cero and Nodo + Accenture.

CERTIFICATIONS AND AWARDS

- COPNIA professional license — Professional Registration Certificate (Auxiliary).
- 3rd place — Advanced Cloud Architecture Hackathon, ESUMER (Dec 2024): AWS infrastructure with Terraform.

LANGUAGES

Spanish — native · English — B1+ (intermediate)

EARLIER EXPERIENCE · TECHNICAL SUPPORT AND CUSTOMER SERVICE

Multi-Skill Agent — Technical support, sales and retention — OneLink BPO — Aug 2019 — Mar 2021

Tier-1 support for internet, TV and phone services (HFC, DTH); tested RPA bots in a test environment, reporting and documenting defects.

Technical Support Representative — Emtelco — Jan 2018 — Jan 2019

Troubleshooting of fiber (FTTH), HFC and UMTS services; equipment setup and connectivity testing.

IT Maintenance Intern — Espumas Medellín — May 2017 — Jan 2018

Support for 100+ internal users, operating system installation and backups, technical manuals and user training.

Customer Service Representative — Teleperformance — Mar 2014 — Nov 2014

Remote support for customers in Spain: billing, complaints and fiber service support.
